:IdentityVerificationController
:AccountProfileService
:AccountProfileRepository
:PrismaService
Database
1. Select document type and files; submit multipart request
2. POST /identity-verifications/documents OR /identity-verifications/ai-check (body)
3. upload(userId, body, file) OR aiCheck(userId, body, files)
ref
3.1 Verify jwt
break
[invalid token / session / role permission]
3.1.1. 401 / 403 error response
3.1.2. Display authentication / permission error
ref
3.2. PermissionGuard: roleHasPermission(roleId, method, path)
break
[request DTO / id validation fails]
3.3.1. 400 validation error
3.3.2. Display validation message
4. upload(userId, body, file) OR aiCheck(userId, body, files)
5. requireRole(userId): findUserWithRoles(userId)
6. user.findFirst(id: userId; deletedAt: null; include roles, profile)
7. SELECT active User + Profile + roles
8. User with roles or null
9. User with roles or null
10. User with roles or null
break
[user or profile missing]
11.1. 404 ProfileNotFoundException
11.2. Propagate HTTP error
11.3. Return error response
11.4. Display error message
break
[user lacks FREELANCER role]
12.1. 403 AccountProfileForbiddenException
12.2. Propagate HTTP error
12.3. Return error response
12.4. Display error message
alt
[standard upload: POST /documents]
break
[file missing]
13.1. 400 IdentityFileRequiredException
13.2. Propagate HTTP error
13.3. Return error response
13.4. Display error message
break
[not PDF / JPEG / PNG OR size > 10 MB]
14.1. 400 IdentityFileInvalidException
14.2. Propagate HTTP error
14.3. Return error response
14.4. Display error message
ref
persistIdentityFile: CloudinaryService.uploadFile if configured; otherwise mkdir/writeFile under uploads; return secure URL or local:// path
15. createIdentityDocument(userId, documentType, fileUrl)
16. idVerificationDocument.create(data)
17. INSERT IdVerificationDocument (status defaults to PENDING)
18. Created identity document
19. Created identity document
20. Created identity document
[AI flow used by current UI: POST /ai-check]
break
[front / selfie missing OR liveness count outside 1..40]
21.1. 400 IdentityAiFrontRequired / SelfieRequired / LivenessRequiredException
21.2. Propagate HTTP error
21.3. Return error response
21.4. Display error message
break
[invalid image type or size: document/selfie <=10 MB; liveness frame <=2 MB]
22.1. 400 IdentityAiImageInvalid / FramesInvalidException
22.2. Propagate HTTP error
22.3. Return error response
22.4. Display error message
23. findIdentityDocuments(userId)
24. idVerificationDocument.findMany(userId; deletedAt null; createdAt desc)
25. SELECT active identity documents newest first
26. Identity documents
27. Identity documents
28. Identity documents
break
[latest document status is APPROVED]
29.1. 409 IdentityAlreadyVerifiedException
29.2. Propagate HTTP error
29.3. Return error response
29.4. Display error message
ref
IdentityAiService.verify(front, back?, selfie, liveness): OCR, QR, face match and liveness. AI transport failure propagates; no document is inserted.
30. Normalize document number; AI VERIFIED => PENDING, otherwise REJECTED with reason
opt
[normalized identity number exists]
31. findApprovedIdentityDocumentByIdentityNumber(userId, number)
32. idVerificationDocument.findFirst; fallback $queryRaw with normalized number
33. SELECT APPROVED active document belonging to another user
34. Duplicate document id or null
35. Duplicate document id or null
36. Duplicate document id or null
37. If duplicate: override status to REJECTED; set duplicateOfId and reviewNotes
ref
persistIdentityFile for front, optional back, selfie: Cloudinary if configured, otherwise local filesystem
38. createIdentityAiDocument(data)
39. idVerificationDocument.create(data)
40. INSERT document, final status, review notes, AI summaries, score and scanned time
41. Created identity document
42. Created identity document
43. Created identity document
44. presentIdentityDocument: convert local URLs to protected file endpoints; present safe QR consistency
45. IdentityVerificationDocumentDto
46. Return controller result
47. 201 Created: IdentityVerificationDocumentDto
48. Display submitted / rejected result; refresh verification state
